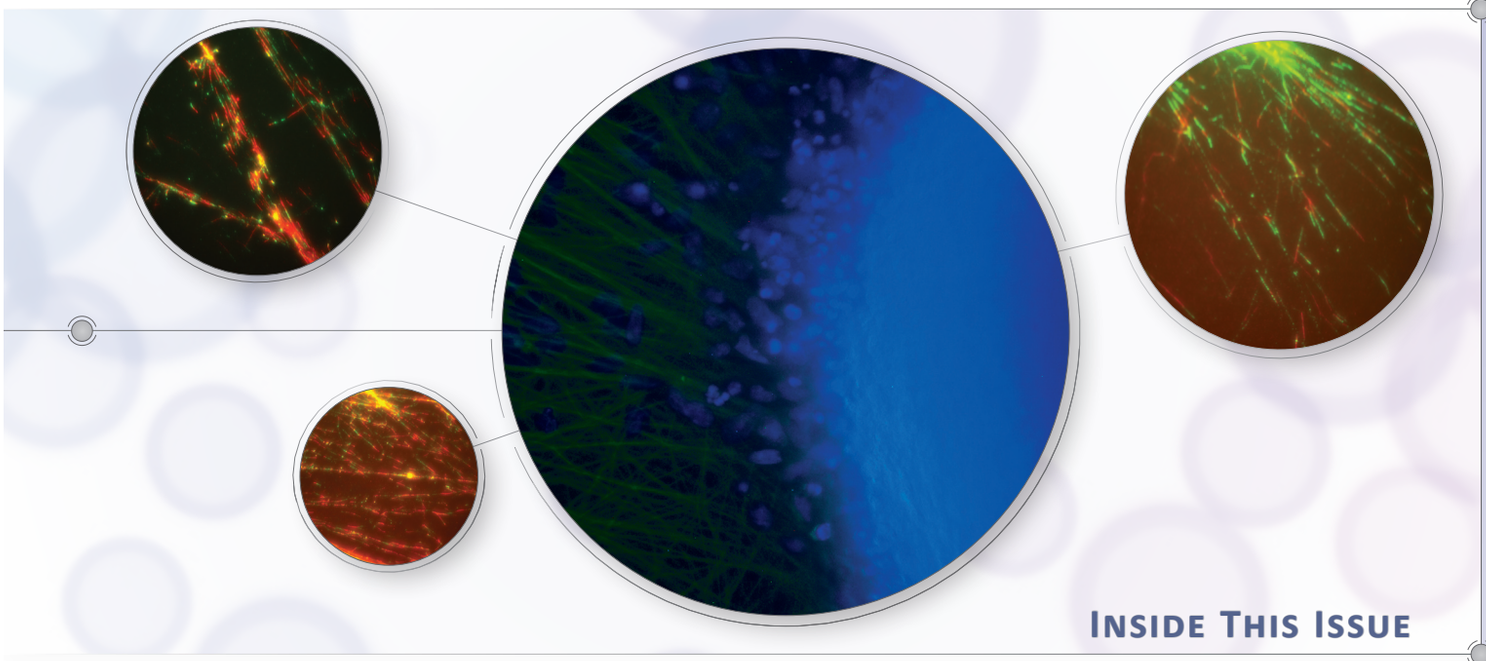
Volume 1, Number 7, July 2012

Stem Cells Translational Medicine®



Inside This Issue

Profiles

The Maryland Stem Cell Research Fund: Promoting Stem Cell Research and Cures
Dan Gincel

Embryonic Stem Cells/Induced Pluripotent Stem (iPS) Cells

Induced Pluripotent Stem Cells from Ataxia-Telangiectasia Recapitulate the Cellular Phenotype
Sam Nayler, Magtouf Gatei, Sergei Kozlov et al.

Tissue-Specific Progenitor and Stem Cells

Characterization of Autologous Mesenchymal Stem Cell-Derived Neural Progenitors as a Feasible Source of Stem Cells for Central Nervous System Applications in Multiple Sclerosis
Violaine K. Harris, Raihan Faroqui, Tamara Vyshkina et al.

Targeting p38 Mitogen-Activated Protein Kinase Signaling Restores Subventricular Zone Neural Stem Cells and Corrects Neuromotor Deficits in *Atm* Knockout Mouse
Jeesun Kim, Paul K.Y. Wong

Enabling Technologies for Cell-Based Clinical Translation

Anti-Inflammatory Mesenchymal Stem Cells (*MSC2*) Attenuate Symptoms of Painful Diabetic Peripheral Neuropathy
Ruth S. Waterman, Jenny Morgenweck, Bobby D. Nossaman et al.

Tissue Engineering and Regenerative Medicine

Tissue-Engineered Vascular Grafts for Cardiac Surgery: Past, Present, and Future
Hirotsugu Kurobe, Mark W. Maxfield, Christopher K. Breuer et al.

A Phase II Trial of Autologous Transplantation of Bone Marrow Stem Cells for Critical Limb Ischemia: Results of the Naples and Pietra Ligure Evaluation of Stem Cells Study
Alessandro Schiavetta, Ciro Maione, Chiara Botti et al.

ISSN 2157-6564
